

# ReadAloud

## Listen Blog and Highlight

Enable users to listen to your blog content with automatic highlighting of the text as it is spoken. Enhance accessibility and engagement on your website with this easy-to-use tool.

## Key Benefits

- ❖ Allows users to listen to your blog content instead of reading it.
- ❖ Highlights the spoken words in real-time, so users can follow along with ease.
- ❖ Let's users pause and resume the speech playback at any time.
- ❖ Provides a more engaging user experience for your audience.
- ❖ Helps you meet accessibility standards by providing a user-friendly tool for people with visual impairments or reading difficulties.
- ❖ Compatible with all major WordPress themes and plugins.
- ❖ Easy installation and activation
- ❖ Prominent speech button to your website that lets users listen to your blog content.
- ❖ Offers a seamless and user-friendly interface.
- ❖ Customizable button and highlight color options

## Installation

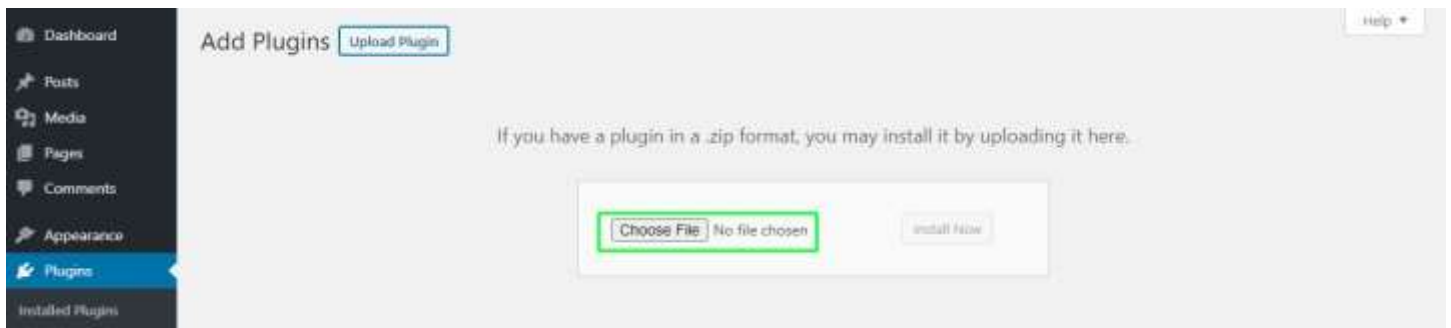

The customer has to login at admin end in WordPress and in the menu section, he has to hover his mouse over the **Plugins** menu which brings out a submenu, then click on the **Add New** submenu.

Then he needs to click on the **Upload Plugin** button to upload the plugin zip file.

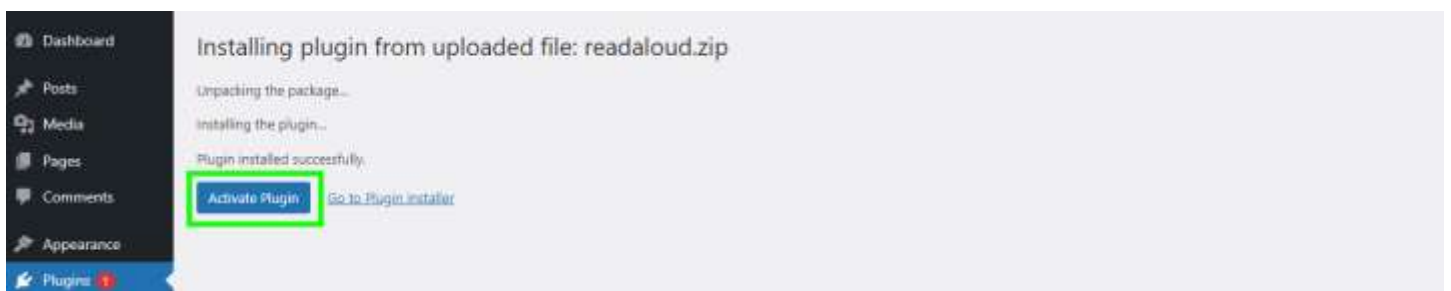

After clicking **Upload Plugin** button, you will be able to see the below image. Then click on **Choose File** button to browse the plugin.

Then, when you select the plugin file, you will be the zip here. Then finally click on **Install Now** button to install the plugin.

After installing the plugin, click on **Activate Plugin** to activate the installed plugin.

# Admin End / Configuration

Now click on **settings** to visit the configuration page of the plugin or you can also click on **ReadAloud** menu under settings menu. Here, admin is able to see configurations

The screenshot shows the WordPress Admin interface with the ReadAloud plugin configuration page. The left sidebar contains a menu with 'Settings' and 'ReadAloud' highlighted in green. The main content area is titled 'Configuration' and contains several settings:

- Shortcode:** A text input field containing `[readaloud title="Listen" style="plain"]`. Below it, a note says *\*Use this shortcode to render "Listen" button.* There are three radio buttons for 'Type': 'plain' (selected), 'outline', and 'solid'. Below these are three 'Preview' buttons, each with a 'Listen' icon and text, corresponding to the selected type.
- Post Content Container Class:** A text input field containing `main-content entry-content`. Below it, notes say *\*Add text parent/container class names* and *\*Seperate multiple classes by whitespace*.
- Choose Post Types:** Two checkboxes: 'Post' (checked) and 'Page' (unchecked).
- Listen Button Color:** A color picker showing the hex code `#1a8917` and a small green square. Below it, the text says 'Listen Button and Icon color'.
- Highlighted Text Background Color:** A color picker showing the hex code `#2137fc1a` and a small blue square with a grid pattern. Below it, the text says 'Highlighted Text/Sentence Background Color'.
- Highlighted Word Background Color:** A color picker showing the hex code `#2137fc7a` and a small blue square with a grid pattern. Below it, the text says 'Speech highlighted word background color'.
- Enable Floating Button:** A checked checkbox and a green circular button with a right-pointing arrow.
- Floating Button Position:** Three radio buttons: 'Bottom Right' (selected), 'Bottom Left', and 'Top Right'.

## Visitor View

Initially you will show a floating button at bottom right of page on your post/blog page.

**OR** you can use shortcode to render button at top of content.

[readaloud style="plain"]
